

PARTICLE6 | PRODUCTIONS

Job Title: AI Editor (Premiere Pro)

Location: Remote / Hybrid

Duration: Full-time / Freelance

Start Date: ASAP

Compensation: DOE

About Particle6

Particle6 is an award-winning creative production company blending boundary-pushing storytelling with cutting-edge AI. From original TV series and documentaries to brand campaigns and immersive content, we use the latest AI tools to enhance the creative process across broadcast and commercial work.

About the Role

We're looking for a talented and versatile Video Editor to join our team. If you can edit, animate, grade, and design sound — and have a genuine interest in AI tools — this is your chance to push creative boundaries with us. You'll be hands-on with everything from branded content and ads to short-form films, using AI-driven workflows to bring fresh ideas to life.

As we have a lot of exciting projects in the works, you'll need to jump right into our AI-driven workflows. Although prior experience with AI tools is not a must, we're seeking someone who is excited to explore and integrate new AI technologies into their workflow. If you're curious about how AI can enhance storytelling and help push creative boundaries, we'd love to hear from you.

What You'll Be Doing

- **AI-Powered Video Creation:** Craft visually stunning short-form videos, branded content, and experimental films using AI tools like Runway, Veo 3, Sora, MidJourney, and ElevenLabs — from concept to final output.
- **Motion Design & Animation:** Bring stories to life through dynamic motion graphics, compositing, and AI-assisted animation that elevate every frame.
- **Editing & Post-Production:** Cut, grade, and finish projects with a cinematic polish — blending traditional editing with generative and procedural AI workflows.
- **Sound Design & Voice Integration:** Shape the audio landscape using AI-driven voice synthesis

and sound design tools to create immersive experiences.

- **Creative Experimentation:** Prototype new visual styles, test emerging AI workflows, and push creative boundaries through rapid iteration and playful experimentation.
 - **Concept Development:** Collaborate on story ideas, visual treatments, and moodboards — helping transform abstract concepts into compelling, AI-enhanced visuals.
 - **Cross-Discipline Collaboration:** Work closely with directors, editors, and technologists to integrate AI tools across the full production pipeline — from pre-vis to post.
 - **Trend Spotting & R&D:** Stay on the pulse of new AI tools, motion trends, and platform aesthetics — sharing insights to keep the team ahead of the curve.
 - **Workflow Innovation:** Help evolve and refine our AI production pipeline — discovering faster, smarter ways to turn imagination into moving image.
-

What We're Looking For

- 3+ years' professional editing experience for branded content or TV.
 - Expertise in Adobe Premiere Pro, Photoshop, and After Effects.
 - Experience or a genuine interest in AI tools like Veo3, Seedream, Nano Banana, ComfyUI, Midjourney, ElevenLabs (and curiosity to explore more).
 - A sharp editorial instinct — cutting with rhythm, nuance, and emotional impact.
 - Strong organizational skills and attention to detail in timelines, files, and workflows.
 - Comfortable working in fast-paced environments with cross-functional teams, combining creative and technical skillsets.
 - A proactive, curious mindset and a passion for experimenting with emerging creative technology.
-
