

PARTICLE6 | PRODUCTIONS

Job Title: AI Video Motion Magician

Location: Remote / Hybrid

Duration: Full-time / Freelance

Start Date: ASAP

Compensation: £35k-£45k

About Particle6

Particle6 is an award-winning creative production company blending boundary-pushing storytelling with cutting-edge AI. From original TV series and documentaries to brand campaigns and immersive content, we use the latest AI tools to enhance the creative process across broadcast and commercial work.

About the Role

We're looking for a multi-skilled AI Video Motion Magician to join our team. If you can edit, animate, grade, and design sound — and love experimenting with AI tools — this is your chance to push creative boundaries with us. You'll be hands-on with everything from branded content and ads to short-form films, using AI-driven workflows to bring fresh ideas to life.

As we have a lot of exciting projects in the works, you'll need to jump right into our AI-driven workflows. You'll have already produced AI content—social media clips, short ads, or even films—and have the eye and technical skills to deliver professional results. We're not looking for a drone shot montage; we want to see your portfolio of AI-generated content.

What You'll Be Doing

- **AI-Powered Video Creation:** Craft visually stunning short-form videos, branded content, and experimental films using AI tools like Runway, Veo 3, Sora, MidJourney, and ElevenLabs — from concept to final output.
- **Motion Design & Animation:** Bring stories to life through dynamic motion graphics, compositing, and AI-assisted animation that elevate every frame.
- **Editing & Post-Production:** Cut, grade, and finish projects with a cinematic polish — blending traditional editing with generative and procedural AI workflows.
- **Sound Design & Voice Integration:** Shape the audio landscape using AI-driven voice synthesis

and sound design tools to create immersive experiences.

- **Creative Experimentation:** Prototype new visual styles, test emerging AI workflows, and push creative boundaries through rapid iteration and playful experimentation.
 - **Concept Development:** Collaborate on story ideas, visual treatments, and moodboards — helping transform abstract concepts into compelling, AI-enhanced visuals.
 - **Cross-Discipline Collaboration:** Work closely with directors, editors, and technologists to integrate AI tools across the full production pipeline — from pre-vis to post.
 - **Trend Spotting & R&D:** Stay on the pulse of new AI tools, motion trends, and platform aesthetics — sharing insights to keep the team ahead of the curve.
 - **Workflow Innovation:** Help evolve and refine our AI production pipeline — discovering faster, smarter ways to turn imagination into moving image.
-

What We're Looking For

- 3+ years' professional editing experience for branded content or TV.
 - Expertise in Adobe Premiere Pro, Photoshop, and After Effects.
 - Experience with AI tools like Veo3, Seedream, Nano Banana, ComfyUI, Midjourney, ElevenLabs (and curiosity to explore more).
 - A sharp editorial instinct — cutting with rhythm, nuance, and emotional impact.
 - Strong organizational skills and attention to detail in timelines, files, and workflows.
 - Comfortable working in fast-paced environments with cross-functional teams, combining creative and technical skillsets.
 - A proactive, curious mindset and a passion for experimenting with emerging creative technology.
-
