

PARTICLE6 | PRODUCTIONS

Job Title: Film/TV AI Production Internship

Location: Hybrid (London-based)

Duration: 6 months (flexible) with potential to become full-time

Start Date: ASAP

Compensation: £24k-£26k

About Particle6

Particle6 is an award-winning creative production company blending boundary-pushing storytelling with cutting-edge AI. From original TV series and documentaries to brand campaigns and immersive content, we use the latest AI tools to enhance the creative process across broadcast and commercial work.

About the Role

We're looking for a curious, creative and technically-minded recent graduate to support our video content production using AI tools. This role is ideal for someone interested in the evolving role of artificial intelligence in TV and film — from scripting and storyboarding to post-production and visual experimentation.

What You'll Be Doing

- **Creative Development:** Contribute ideas and research to help shape treatments, storyboards, and concepts for TV, branded, and digital projects.
- **Visual Experimentation:** Explore how AI can be used in motion design, storyboarding, and visual effects — testing tools and creating sample outputs for internal projects.
- **Post-Production Assistance:** Support editors and producers in AI-assisted workflows, including organising assets and preparing content for delivery.
- **Pitch & Presentation Materials:** Help prepare pitch decks and proof-of-concept videos, bringing visual ideas to life through AI-generated imagery and motion.
- **Research & Development:** Keep track of new tools, AI trends, and creative techniques — sharing insights with the team and helping identify ways to improve workflows.
- **Production Support:** Assist with planning and logistics for live-action shoots and help integrate AI tools in pre-production or post-production stages.

- Learning & Collaboration: Work closely with producer, and editors to understand how AI is transforming storytelling in film and TV — gaining hands-on experience in real-world creative environments.
-

What We're Looking For

- A passion for video storytelling and emerging creative tech
 - Basic experience with Adobe Premiere Pro (or similar editing software)
 - Interest or familiarity with AI tools like Runway, ChatGPT, Midjourney, ElevenLabs, etc.
 - Strong organisational skills and attention to detail
 - Bonus: Python or creative coding knowledge
 - Comfortable working in fast-paced environments with cross-functional teams, combining creative and technical skillsets.
 - A proactive, curious mindset and a passion for experimenting with emerging creative technology.
-
