

PARTICLE6 | PRODUCTIONS

Job Title: Development Researcher for Film/TV
Location: Hybrid (London-based)
Duration: Part-time/Full-time
Start Date: ASAP
Compensation: £24k-£26k

About Particle6

Particle6 is an award-winning creative production company blending boundary-pushing storytelling with cutting-edge AI. From original TV series and documentaries to brand campaigns and immersive content, we use the latest AI tools to enhance the creative process across broadcast and commercial work.

About the Role

We're looking for a talented and resourceful Development Researcher to join our team and help shape the future of TV and film content. You'll work across a broad spectrum of genres, with a focus on unscripted TV, as well as scripted drama, comedy, and children's content. This is an exciting opportunity for someone who thrives on creative ideation, with a strong interest in integrating AI tools into the development process.

What You'll Be Doing

- **Creative Development:** Contribute ideas and research to help shape new TV and film concepts across a range of genres — from factual entertainment and unscripted formats to scripted drama, comedy, and children's content.
- **AI-Enhanced Ideation:** Use tools such as ChatGPT, MidJourney, Runway, and Sora to support brainstorming, visual development, and creative storytelling — helping to prototype and visualise early-stage ideas.
- **Research & Insight Gathering:** Identify trends, stories, and talent relevant to our development slate. Research audiences, themes, and industry movements to inform the creative direction of projects.
- **Pitch & Presentation Support:** Assist in building pitch decks and treatments for internal and external presentations — using both traditional and AI-driven tools to communicate ideas visually and effectively.

- **Story & Format Development:** Work closely with producers and writers to refine storylines, develop character ideas, and outline potential series structures and episode formats.
 - **Collaboration & Workflow:** Partner with development producers, editors, and designers to integrate AI tools into the creative workflow — helping streamline processes and generate innovative approaches to storytelling.
 - **Trend Spotting:**
Keep on top of emerging trends in TV, film, and digital storytelling — as well as advancements in AI and creative technology — to inspire new ideas and strengthen pitches.
-

What We're Looking For

- Experience in creative ideation for Film/TV/ with a passion for development across genres.
 - Proven ability to create compelling pitch decks for clients, production companies, and broadcasters.
 - Experience of using AI tools for creative ideation, workflow automation, and video generation.
 - Basic experience with editing software (e.g., Adobe Premiere Pro) for creating sizzle reels.
 - Excellent communication skills and attention to detail within a fast-paced environment.
 - Comfortable working in fast-paced environments with cross-functional teams, combining creative and technical skillsets.
 - A proactive and innovative mindset, always seeking to push the boundaries of creative possibilities and an active interest in emerging creative tech
 - Experience with: Adobe Premiere Pro (or similar editing software), Canva, ChatGPT, Midjourney, Runway, GSuite.
-
